WITHHAMMAD

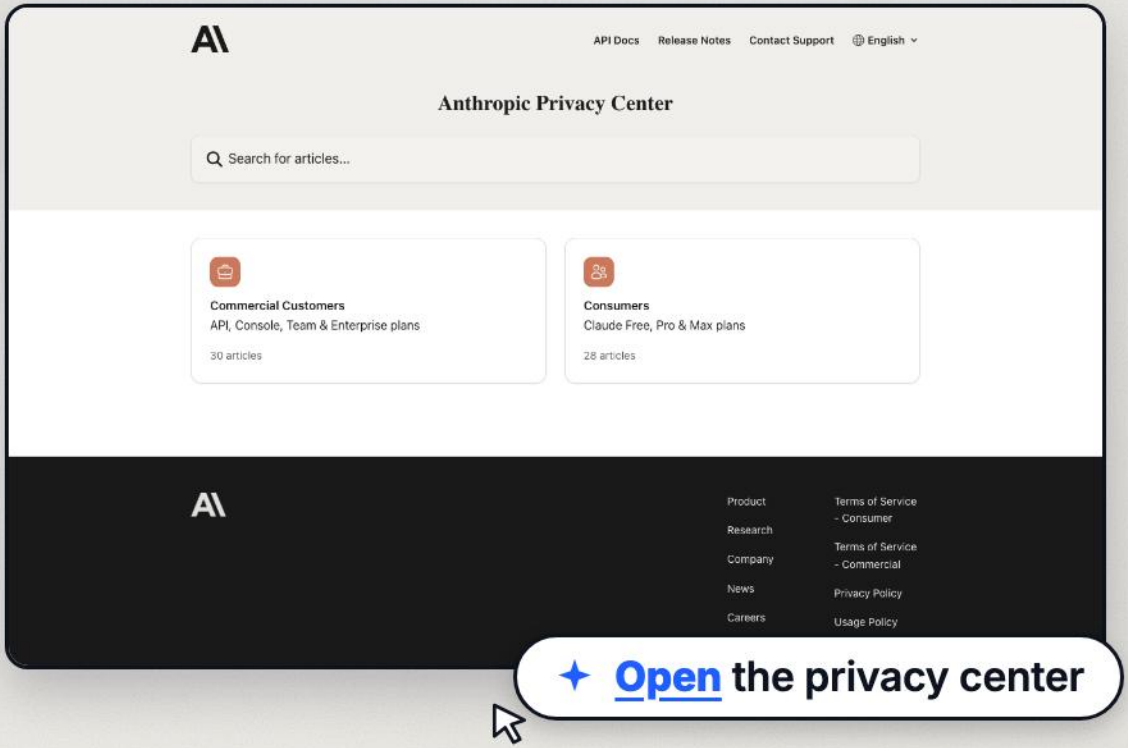

AI Privacy Check-Up

10 settings · 10 minutes · ChatGPT + Claude

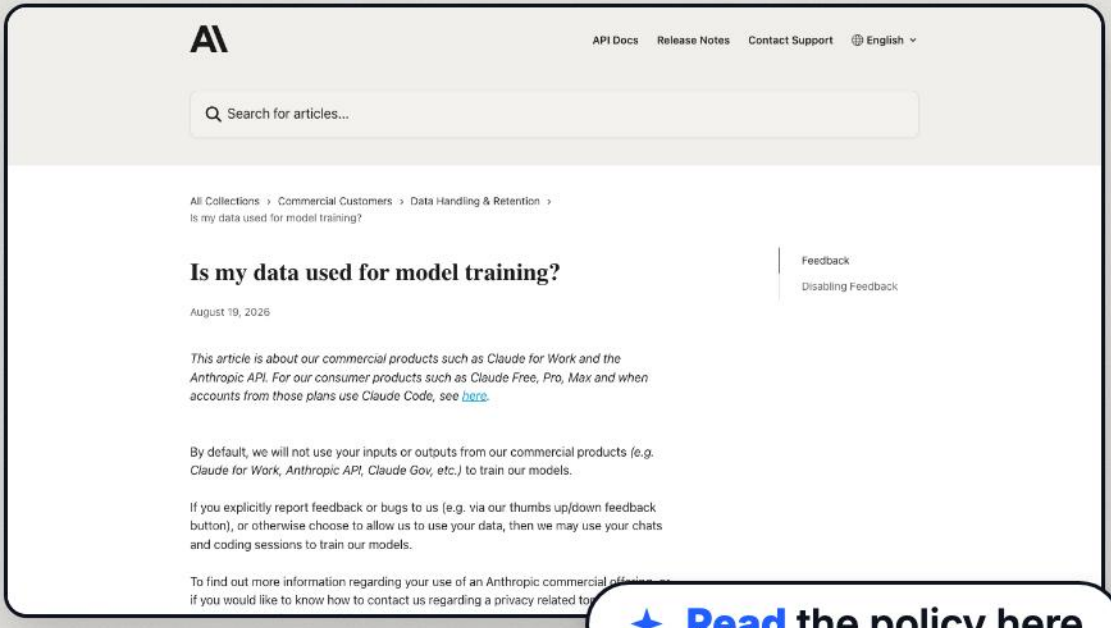

10 settings, 10 minutes, no expert needed

- The setup is inside: ChatGPT + Claude Settings
- What you get: every switch, and what it does

1 Choose the right plan

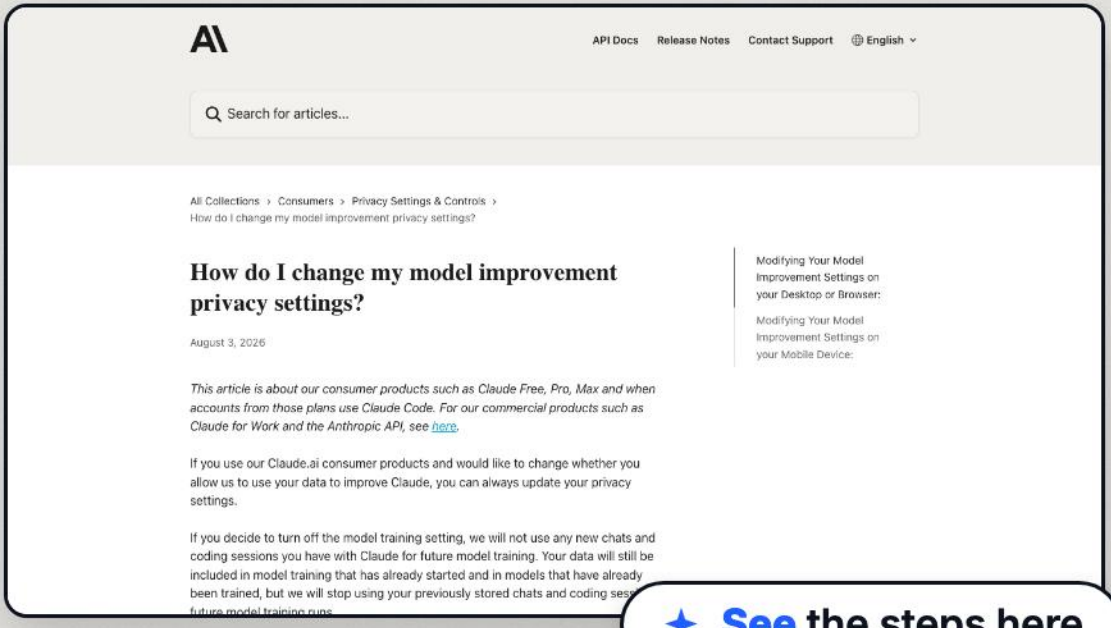

- ChatGPT: Business, Enterprise, Edu and API are not trained on by default
- **Claude:** Team, Enterprise and API are not trained on by default

Personal plans: your own settings decide

2 Turn off training

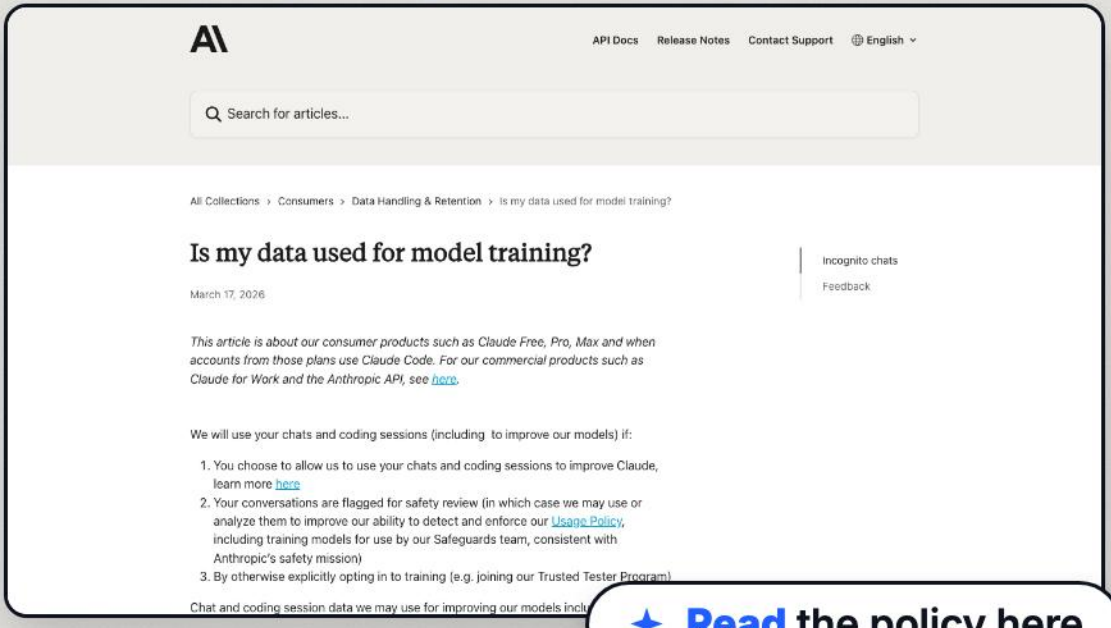

- ChatGPT: Settings > Data controls > Improve the model for everyone: off
- **Claude:** Settings > Privacy > Help improve our AI models: off

New chats stop training. Your history stays.

3 Skip chat feedback

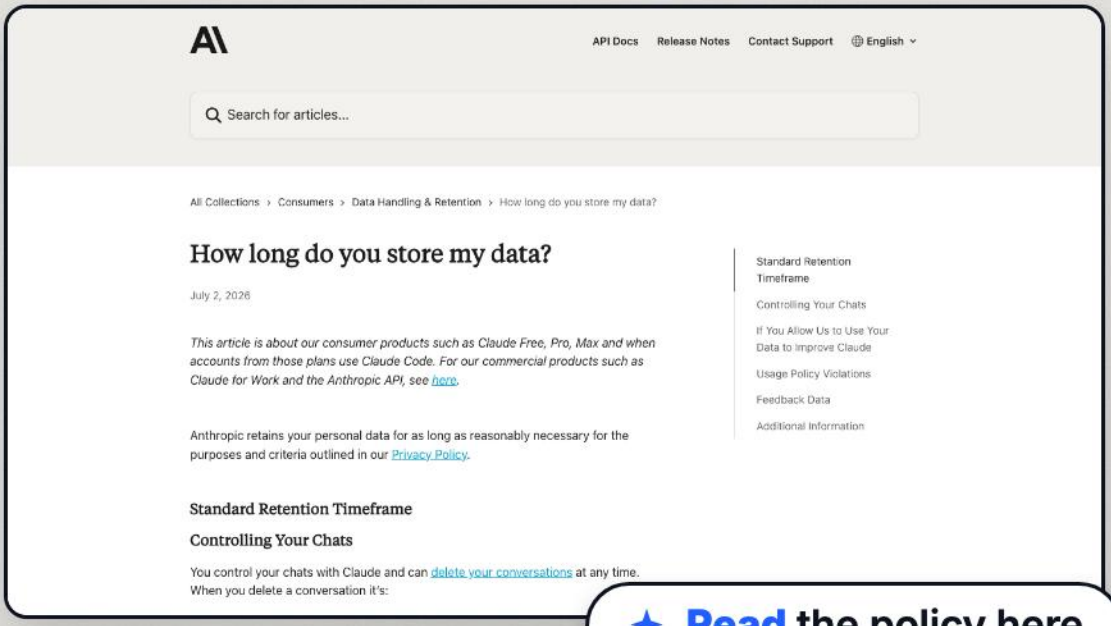

- ChatGPT: a thumbs up/down can put the whole chat in training, even opted out
- **Claude:** a thumbs up/down stores the whole chat for up to 5 years

Skip the thumbs on anything sensitive

4 Keep chats private

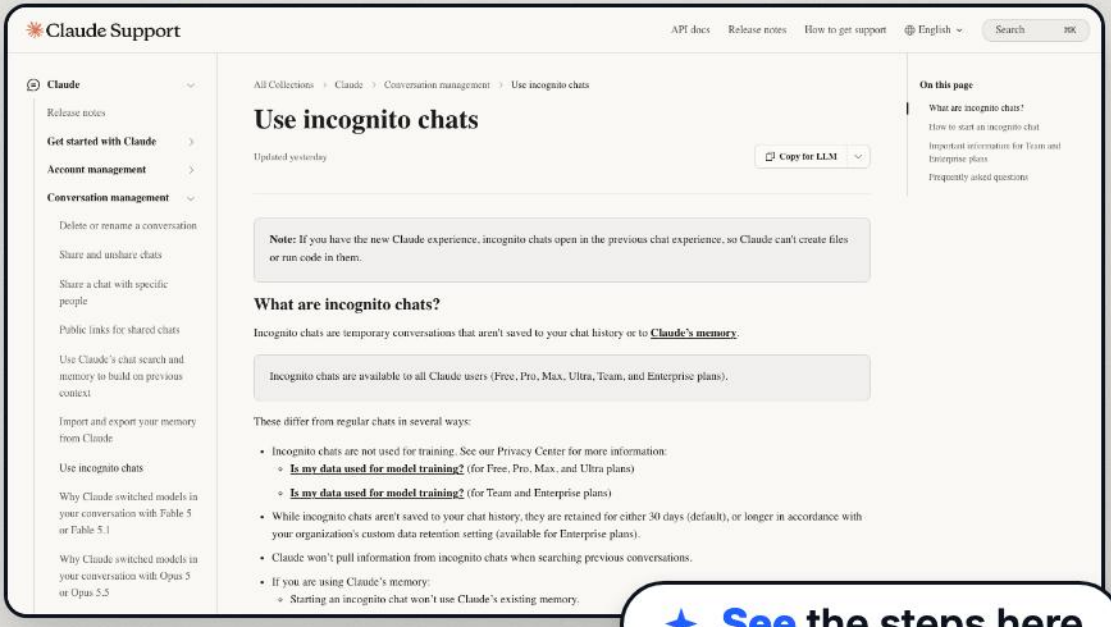

- ChatGPT: ••• > Lock chat hides a chat behind a 4-digit PIN (rolling out)
- **Claude:** delete a chat: gone from history now, from servers within 30 days

A locked chat is hidden, not encrypted

5 Use temporary chat

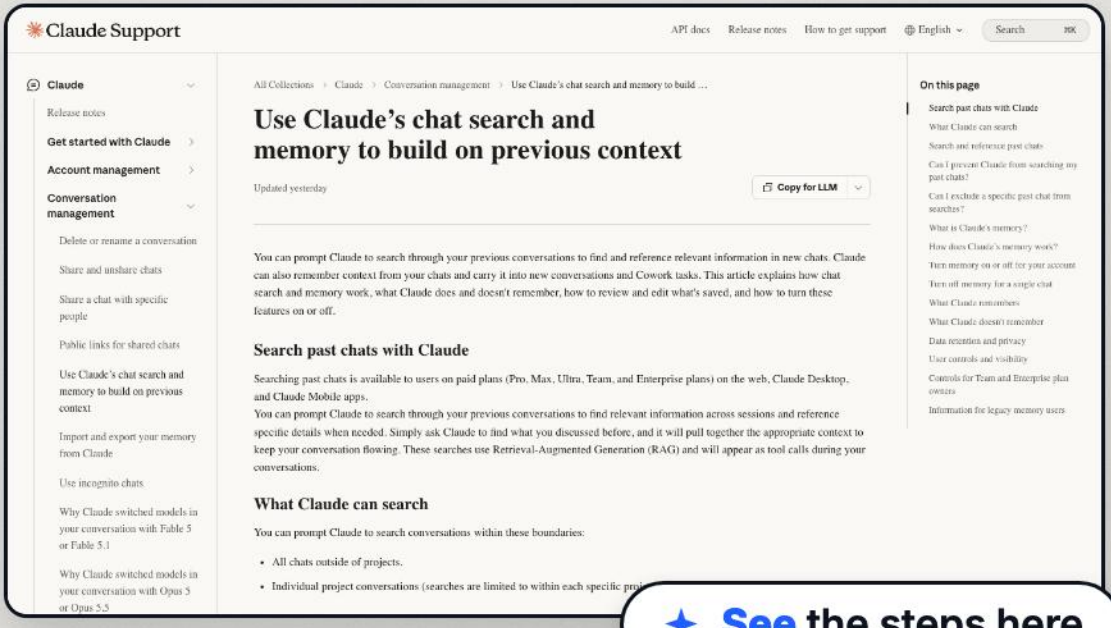

- ChatGPT: new chat > Temporary. No history, no new memories, no training
- **Claude:** ghost icon (top right) starts an incognito chat. Same rules.

Both may keep a copy up to 30 days for safety

6 Turn off memory

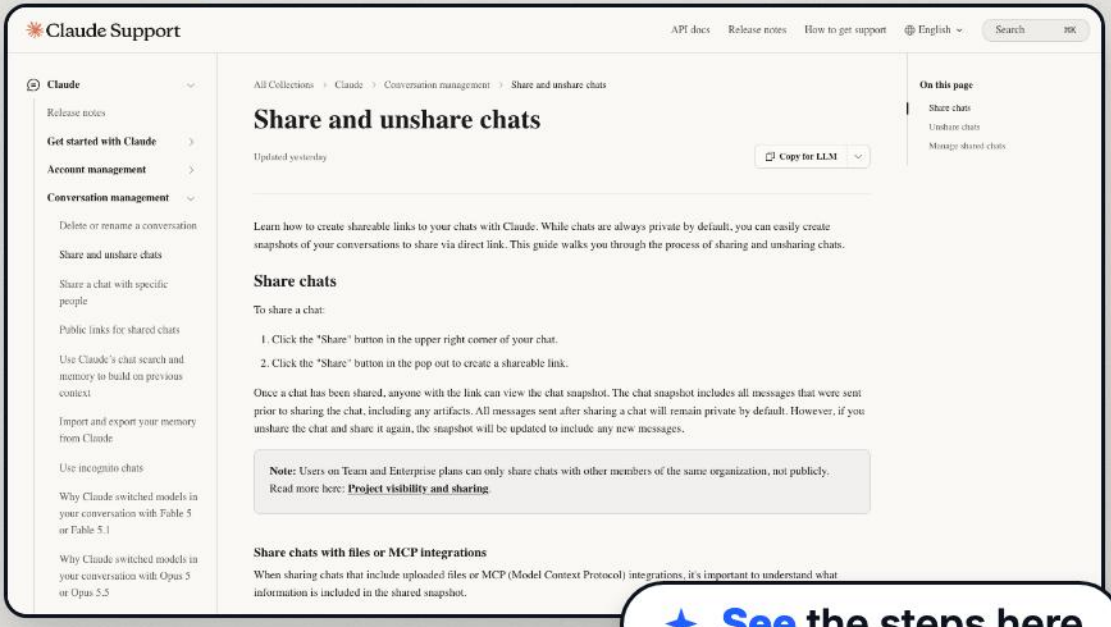

- ChatGPT: Settings > Personalization > Memory
- **Claude:** Settings > Your Claude > Memory from chats: pause or reset

Deleting a chat may not delete its memories

7 Delete old shared links

- ChatGPT: Settings > Data controls > Shared links > Manage
- **Claude:** Settings > Privacy > Shared chats > Manage > Unshare

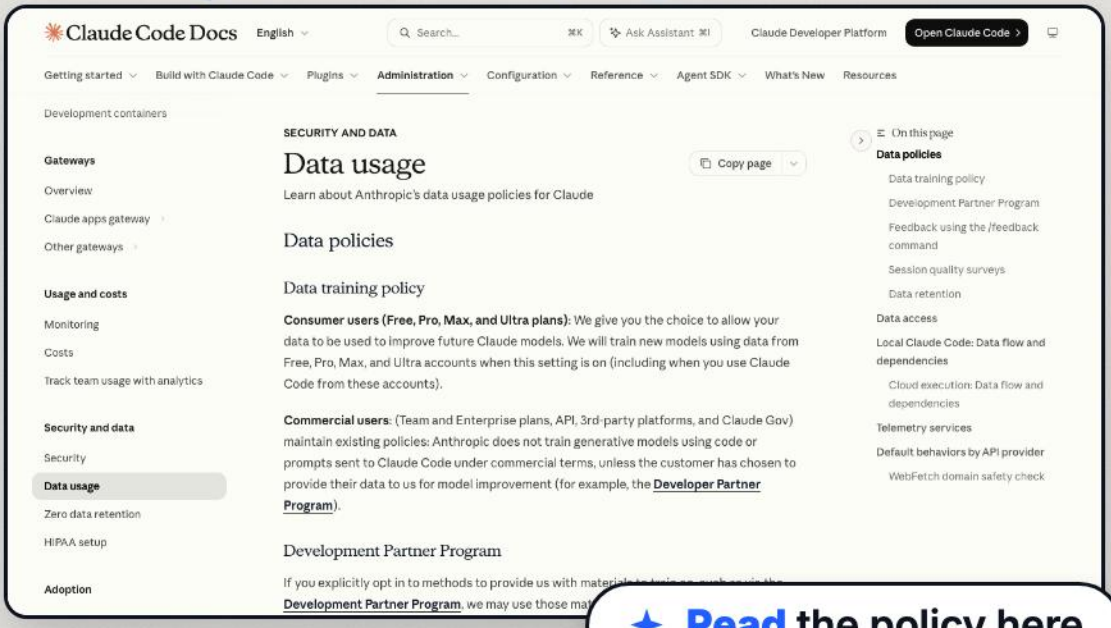

✦ See the steps here

Anyone with a link can read that chat

8 Check your Codex settings

- Codex: Codex settings > Include environments, a separate training switch
- **Claude Code:** follows your Claude training setting; /feedback kept 5 years

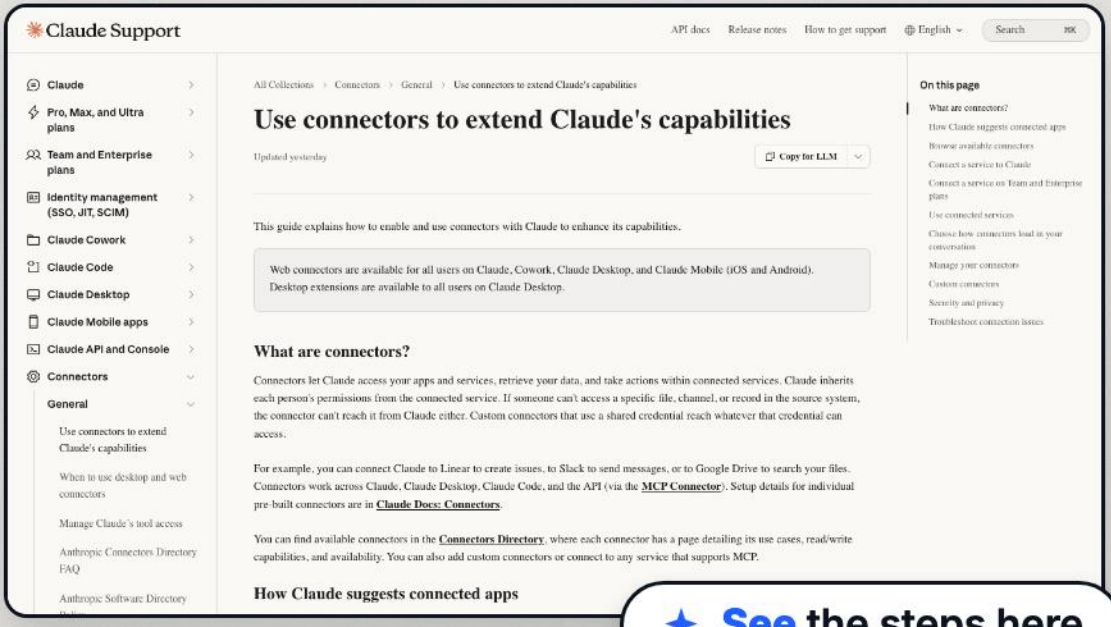

✦ **Read** the policy here

Opting out in ChatGPT doesn't change Codex's

9 Audit your extensions

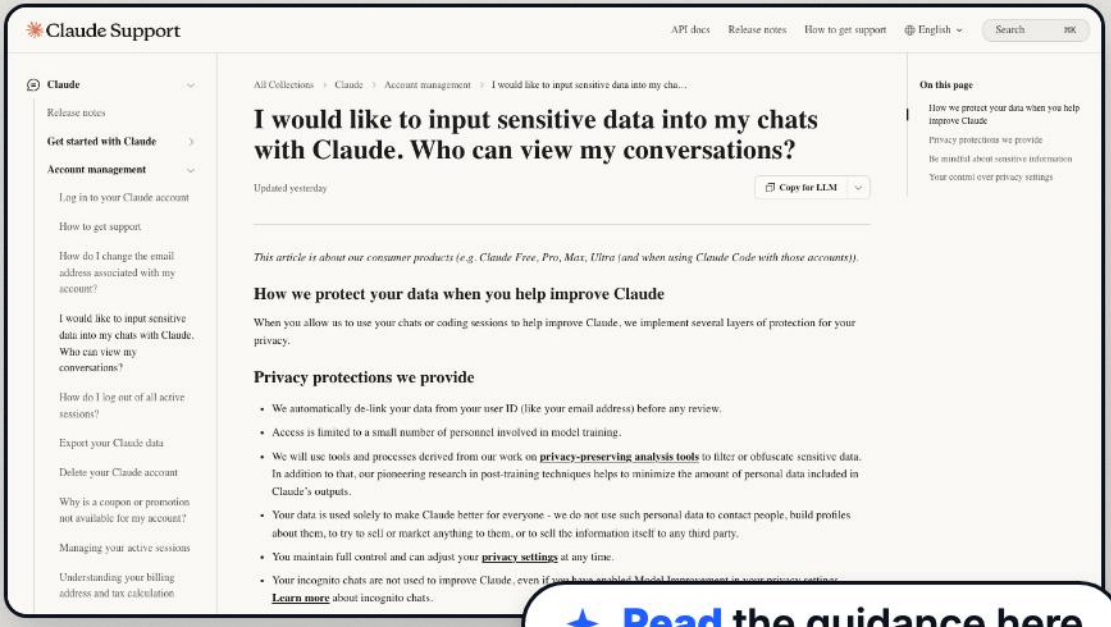

- ChatGPT: Settings > Plugins > app > Disconnect what you don't use
- **Claude:** Customize > Connectors (now Plugins) > Disconnect

Connect only services you trust and need

10 Protect real secrets

- Never paste passwords, API keys, card or bank numbers, health records
- **Keys:** keys go in an encrypted secret, never in code or chats

✦ **Read** the guidance here

Leaked a key? Rotate it right away.
