WITHHAMMAD

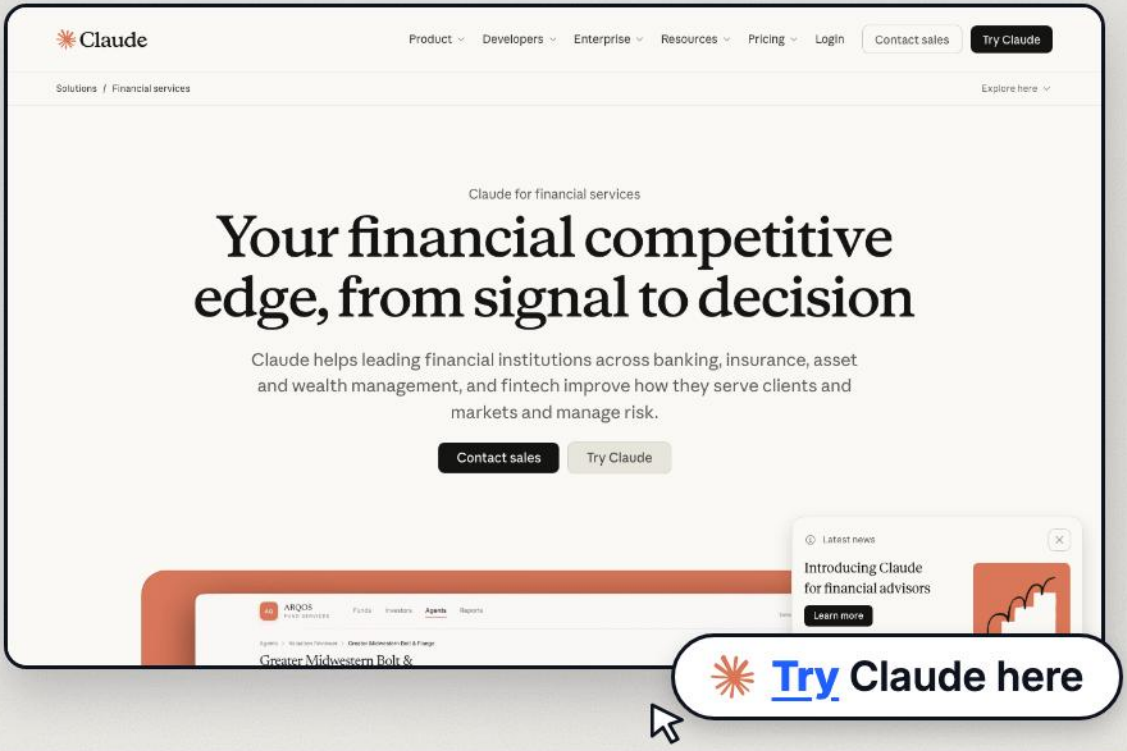

Consulting Using AI

10 use cases, each with a copy-paste prompt

AI won't replace consultants. It upgrades them.

- The setup is inside: claude.ai
- What you get: 10 consulting jobs, one tested prompt each

Rapid Data Analysis

- Upload a client export and get trends, outliers and next questions
- **Best for:** A first pass on messy client data

COPY THIS PROMPT

```
You are a management consultant. Analyse the attached [DATASET] for [CLIENT GOAL]. Give: 1) the 5 biggest trends, 2) outliers worth a second look, 3) 3 questions for the client. Show the calculation behind every number, state each assumption and flag missing or odd data. Do not estimate figures that are not in the file.
```

Tip: remove client names before you upload

Market Research

- A sourced snapshot of a market: size estimates, drivers, key players
- **Best for:** Kick-off decks and new-client prep

COPY THIS PROMPT

```
Research the [MARKET] in [REGION] for [CLIENT TYPE]. Summarise market size estimates, growth drivers, main players and recent regulation. Cite a dated source for every figure; where sources disagree, show the range. Mark anything older than 2 years. If you cannot find a number, write 'not found' instead of estimating.
```

Tip: turn on web search before you paste

Strategy Frameworks

- SWOT, PESTEL or Five Forces built for one client, not a template
- **Best for:** Workshops and strategy sessions

COPY THIS PROMPT

```
Build a [SWOT / PESTEL / Five Forces] for
[CLIENT], a [BUSINESS] in [MARKET]. Use only my
notes below plus sources you cite. For each
point add the evidence and one 'so what' for
the client. List the assumptions you made and 3
points to verify with the client.
Notes: [PASTE NOTES]
```

Tip: run it once per framework, then compare

Competitive Intelligence

- Side-by-side competitor profiles: offer, pricing, positioning, moves
- **Best for:** Pitches and positioning work

COPY THIS PROMPT

```
Compare [CLIENT] with [COMPETITOR 1],
[COMPETITOR 2] and [COMPETITOR 3]. Table:
target customer, core offer, public pricing,
positioning, moves in the last 12 months. Use
their own sites and dated news, with a link for
every cell. Write 'not public' where data is
missing. End with 3 gaps [CLIENT] could own.
```

Tip: re-run it monthly to catch new moves

Financial Modeling

- A driver-based model with base, best and worst case you can change
- **Best for:** Business cases and budget reviews

COPY THIS PROMPT

```
Build a 3-year driver-based model for [BUSINESS / PROJECT] as a table I can paste into Excel or Sheets. Drivers: [PRICE, VOLUME, CHURN, COSTS]. Use only my inputs: [PASTE INPUTS]. Show base, best and worst case, the formula for each line and every assumption. Ask me for missing inputs instead of guessing.
```

Tip: check every formula before it goes to a client

Instant Presentations

- Turns findings into a storyline: one message per slide
- **Best for:** Client and steering decks

COPY THIS PROMPT

```
Turn these findings into a [10]-slide deck
outline for [AUDIENCE] at [CLIENT]. Lead with
the answer (pyramid principle). For each slide:
an action title as one full sentence, 3
bullets, the chart to use and the finding it
comes from. Do not add numbers that are not in
my findings.
Findings: [PASTE]
```

Tip: then ask for the slides as a file

Risk Assessment

- A risk register: likelihood, impact, warning signs, mitigations
- **Best for:** Project kick-offs

COPY THIS PROMPT

```
Act as a risk advisor. For [PROJECT] at
[CLIENT], build a risk register: risk, cause,
likelihood 1–5, impact 1–5, early warning sign,
mitigation, owner. Cover strategic,
operational, financial, legal and people risks.
Explain each score in one line, mark what is an
assumption and flag the top 3 for this week.
Context: [PASTE]
```

Tip: review the scores with the project owner

Performance Tracking

- A weekly KPI read-out: what moved, why, and what to do next
- **Best for:** Retainer reporting

COPY THIS PROMPT

```
Here are this week's KPIs for [CLIENT] vs last week and target: [PASTE TABLE]. Write a one-page read-out: what moved most, likely reasons (label each confirmed or hypothesis), which metric is off-track and 3 actions with an owner. Use only numbers from the table, show every % change calculation and ask if a target is missing.
```

Tip: paste the same table format every week

Scenario Planning

- 3-4 plausible futures, their triggers, and the moves for each
- **Best for:** Boards and 'what if' questions

COPY THIS PROMPT

```
Plan scenarios for [CLIENT] over the next
[TIMEFRAME]. Pick the 2 biggest uncertainties
for [INDUSTRY], build 4 scenarios from them,
and for each give: the story, early signals to
watch, impact on [KEY METRIC] as a range, and
no-regret moves. State every assumption, cite
sources for external trends and never present a
forecast as fact.
```

Tip: revisit the early signals every quarter

Collaboration Readiness

- An AI learning path for the client team, by role and level
- **Best for:** Upskilling client teams

COPY THIS PROMPT

```
Design a [6]-week AI learning path for [CLIENT TEAM] ([ROLES], [SKILL LEVEL]). For each week: one skill, one hands-on task using their real work, a 15-minute exercise and how to check it was learned. Recommend only free official courses (e.g. academy.claude.com) with links. Add the data and privacy rules the team must follow.
```

Tip: start with the team's most repeated task
